

I have known Jason for over 15 years and I have never met a politician who is more concerned about serving others than Jason. He works tirelessly to listen to the people he serves, and spends countless hours working making New Mexico a better place for all of us. People in our area are worried about schools and businesses, and Jason has brought forward tax reform that would result in better funding for our schools, that would attract more businesses to New Mexico, and that would allow New Mexicans to keep more of their hard-earned money. Jason has supported pay raises for teachers, worked to ensure that teachers can take advantage of all their benefits, and has worked with Rio Rancho Public Schools to try to equalize funding for our students. As a professional he has worked to provide support for Ebola outbreaks in Africa, increase the number of ventilators for NM COVID-19 patients, and researched other infectious diseases and developing technologies to protect our country and soldiers. While his list of professional accomplishments is extensive, I think Jason's most important contribution is his humble, personal service to his family, friends, neighbors and community. Jason can often be found leading a cub scout meeting, working with young people in youth group activities, helping an elderly neighbor with yard work, and listening to someone in need. He is ever trying to find ways to make the world a better place and we are lucky in Rio Rancho to have him as our representative in Santa Fe! Join with me to re-elect Jason Harper to NM State District 57.
