

“As a retired university professor, I spent a lifetime seeing how a good education can change a person’s life, enlarging their life’s options. That’s why I support Jason Harper for our State Representative.

Dr. Harper has consistently fought to keep the Lottery Scholarship program afloat, to help pay for New Mexico’s kids’ college tuition. I’ve had countless students in my computer science and math classes over the years, who used this scholarship to advance their education. Many of them might not have been there, but for the Lottery Scholarship.

Even my own children used the Lottery Scholarship, and my wife and I were glad it was there to help!

Dr. Harper kept the fund from being raided, ensured that all students have access to it, and even worked to make it self-supporting, to save our tax dollars.

I am proud to endorse Jason Harper, to keep him advocating for our community’s kids.”

—Dr. Reinaldo A.Z. García, retired University Professor
